LOST TIME ACCIDENTS

I don't know how best to express how pleased I am with every single person that is working on site. They all conduct themselves with an amazing level of professionalism and are all hard workers. That goes for every single person here, and your team has made this very smooth as well. I knew going into this that Fagen was the gold standard but to still be living up to that expectation 14 years from our original build is impressive. Thanks for the partnership.

-Erik Huschitt

Team is what it takes.®

# Scope Of Work

## Full EPC Scope Included:

- 223 cu yards of concrete
- 5 tons of structural steel
- 100 sq. ft. of siding
- 2000 ft. of piping with 0% rejection
- 520 ft. of pipe insulation

# Points of Interest

Demolition was required before installation could happen for fermenter 5. Fermenter 6 is located in between fermenter 4 and 5. The fermenter is located outside, however the equipment required to operate the fermenter is located within the existing fermenter building.
